

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

INTRODUCTORY LETTER.

MICHIGAN,
DEPARTMENT OF STATE,
Lansing, May 1, 1897. }

HON. HAZEN S. PINGREE, *Governor of the State of Michigan:*

SIR—I herewith present the Eighteenth Annual Statistical Report of the Farms and Farm Products of Michigan. It embraces statistics of the farm products of the year 1895, and the land and live stock statistics of 1896.

There are thirty-two townships in the State from which no returns have been received, twelve of which are in the upper peninsula, eleven in the northern counties of the lower peninsula, three in the central counties and six in the southern counties. Of the six townships in the southern counties, one is in each of the counties of Cass, Hillsdale, Ionia, Kent, Lapeer and St. Clair.

For most of the townships from which no reports have been received, the land statistics, and the wheat, wool and other products, have been either estimated or copied from the preceding report.

CROP SEASON OF 1895.

The excessive drouth that prevailed in Michigan in the months of June, July and August, 1894, was broken on the 3d of September, and it rained generally throughout the State from this date to the 10th, followed by light rains on the 13th, 14th and 15th, and again on the 21st to the 24th inclusive. These rains came in time and were sufficient to place the ground in fairly good condition for the sowing of the wheat crop of 1895. The rainfall of October was about normal, in November one and one-fourth inches below, and in December more than one inch below, the normal. The ground was practically bare during the entire month of December, yet wheat was but slightly if at all injured.

Cold weather prevailed during the months of January and February, 1895, but snow fell in the early part of January in sufficient amount to afford ample protection to the wheat plant, and lay upon the ground until near the close of February. The average depth of snow in the lower peninsula on the 15th of January was about eight inches, and it was about the same depth at the end of the month. In the southern counties the

snow was all gone at the end of February, but in the central and northern counties the covering was yet ample.

On the first day of April the frost was not yet all out of the ground even in the southern counties of the State. The weather in March was cold and dry. The mean temperature was below the normal, and the precipitation very light. Wheat made no growth in March; the fields did not even "green up".

April was a month of high temperature but of light rainfall, and wheat and grass made little growth. Before the 13th the rainfall was less than one-half the normal, and after the 13th there was not sufficient rain anywhere in the State to be of appreciable benefit. The average condition of wheat May 1 was estimated as follows, comparison being with vitality and growth of average years: Southern four tiers of counties, 77 per cent; central counties, 87 per cent; northern counties 89 per cent, and State, 80 per cent. It was estimated that very little wheat would be plowed up because winter-killed or otherwise destroyed, and with few exceptions no damage to the crop by insects was noted.

Grass, like wheat, was backward on the first of May because of the drouth. It was believed that unless an abundance of rain came soon, both would be greatly damaged. Apples and peaches promised fairly good crops. The average of the estimates for the southern counties were, apples 84 and peaches 81 per cent, and for the State, apples 86 and peaches 82 per cent.

The drouth that prevailed during the early spring continued during May causing serious damage to crops. The average condition of wheat in the southern counties June 1 was 66, a decline of eleven per cent in one month. The decline in the central counties was four and in the northern, two per cent. Wheat only six inches to a foot high was in head June 1, it was thin on the ground, and in the southern counties insects,—reported "Hessian fly", "insects", "midge", etc.,—were doing much damage.

July 1 the drouth was not broken. Four light rains passed over the State in June, but the amount of rainfall at each was insignificant. The average rainfall in the State during the month was only 1.37 inches, a deficiency of 2.54 inches compared with the normal. The amount of rain in the southern four tiers of counties was 1.18 inches; in the central counties 1.10 inches, and in the northern counties 1.61 inches. The deficiency in the southern counties was 2.28 inches; in the central 1.68 inches and in the northern 1.27 inches. The rainfall in the southern two tiers of counties in June was only 1.30 inches as compared with the normal of 4.33 inches, or a deficiency of 3.03 inches.

The normal rainfall in the southern two tiers of counties in the three months, April, May and June is 10.95 inches. The actual in 1895 was 5.02 inches. The deficiency in the three months in the 3d, 4th, 5th and 6th tiers of counties was 4.21 inches, and in the State 4.09 inches.

Wheat was estimated to yield only 9.88 bushels per acre in the State, it being the lowest estimate ever made July 1. It was nearly six bushels lower than the estimate of July 1, 1894, and nearly seven bushels lower than the average yield in the eighteen years, 1876-1893.

Meadows and pastures were probably never in poorer condition July 1, than in 1895; spring seeding to clover was nearly all lost, and the outlook for apples and peaches was far from encouraging. The former promised one-third, and the latter about five-eighths of an average crop.

The third week in July showers occurred generally throughout the State, but following the severe drouth of three months' duration, the rainfall was insufficient to afford more than slight relief. Three light rains passed over the State during the month, the first occurring on the 15th, the second on the 19th to 21st, and the third on the 27th, followed by lighter showers on the 29th and 30th. The average rainfall in the State in July was 1.28 inches. The average in the southern four tiers of counties was 1.65 inches as compared with a normal of 2.02 inches. The average rainfall in the central counties was about one-half, and in the northern one-third, the normal.

Crops of all kinds were greatly damaged by the drouth. August 1, the average condition of corn was 79 per cent, comparison being with vitality and growth of average years, and potatoes were estimated to yield 70 per cent of an average crop. Hay was estimated to yield but three-tenths of the yield, and the condition of meadows and pastures was but 31 per cent of condition in average years. Apples that promised in April a full crop, in May 86 per cent of a crop, on August 1 promised no more than one-fourth of a crop.

August was a warm month, the mean temperature for the State being 67.8 degrees as compared with a normal of 66.6 degrees, and for the southern counties 70.4 degrees as compared with a normal of 69.8 degrees. There was an excess of precipitation in the State, and each section except the upper peninsula, but in the southern part of the State three-fourths of the rainfall occurred after the 22d, too late to be of greatest benefit to summer crops, but early enough to put the ground in good condition for plowing for fall wheat. The rainfall in the State and each section was as follows: State, 3.11 inches; southern counties, 3.33 inches; central counties, 3.14 inches; northern counties, 2.72 inches and upper peninsula, 2.30 inches. Compared with the normal the excess in the State was 0.87 inches; in the southern counties, 1.20 inches; in the central, 0.55 inches; and in the northern, 0.25 inches, and the deficiency in the upper peninsula was 0.37 inches.

The mean temperature of the State for September was 64.2 degrees, an excess of 3.9 degrees, and of the southern counties it was 66.0 degrees, an excess of 4.1 degrees, compared with the normal. It was above the normal in the central and northern counties and upper peninsula.

The average rainfall in the State in September was 2.82 inches, or 0.23 inches more than the normal. In the southern counties there was a deficiency of 0.76 inches, in the central an excess of 0.32 inches, in the northern an excess of 1.48 inches, and in the upper peninsula an excess of 3.46 inches. The rainfall in the upper peninsula was excessive, amounting to 6.31 inches.

The weather in October was cool and dry. The average temperature of the State was 3.3 degrees below the normal, and the rainfall was deficient in all parts of the State. The rainfall in the southern counties was 0.78 inches, or about one-third, and in the central counties it was 0.47 inches or about one-fifth the normal. The deficiency in the northern counties was 1.15 inches, and in the upper peninsula 0.75 inches. The dry weather in October told heavily on the growing wheat. The average condition in the State on November 1 was 78, in the southern counties, 72; the central, 84, and the northern, 95, vitality and growth of average years being represented by 100. The condition in the State and southern and central sections was lower than reported in any year since 1889, when the condition in the State was 62, and in the southern counties 58.

The crop growing season of 1895 in the lower peninsula of Michigan may be characterized as hot and dry. The mean temperature was above the normal in May, June, August and September, and only slightly below in July. October was a cool month, the mean temperature in the southern four tiers of counties being 3.7 degrees below the normal. The average rainfall was below the normal each month except August in the southern counties, and except August and September in the central counties. The excesses in the months named were hardly sufficient to be of appreciable benefit. The total rainfall in the six months, May-October, in the southern four tiers of counties where 85 per cent of the crops of the State are grown, and in the southern and central counties where about 97 per cent of the crops are grown, was but a little more than two-thirds the normal.

The mean temperature of the State in November and December was slightly below the normal. The precipitation in November in the southern and central counties was in excess, and in the northern counties and upper peninsula below, the normal. The cool, wet weather in the southern and central sections was very beneficial to the growing wheat. The precipitation in December, including rain and melted snow, was excessive. The average for the State was 4.89 inches; in the southern counties, 5.89 inches; in the central counties, 4.27 inches; northern counties, 3.02 inches, and in the upper peninsula, 3.23 inches. The average excess in the southern counties was 3.34 inches, and in the central counties 1.77 inches.

The following table shows for the southern counties (southern four tiers), and the central counties (fifth and sixth tiers), respectively, by months, the normal temperature as determined by observations at the different meteorological stations during a long series of years, the mean monthly temperature in 1895, and the departure of such monthly temperature from the normal. The plus sign shows that the temperature in 1895 was above, and the minus sign that it was below the normal:

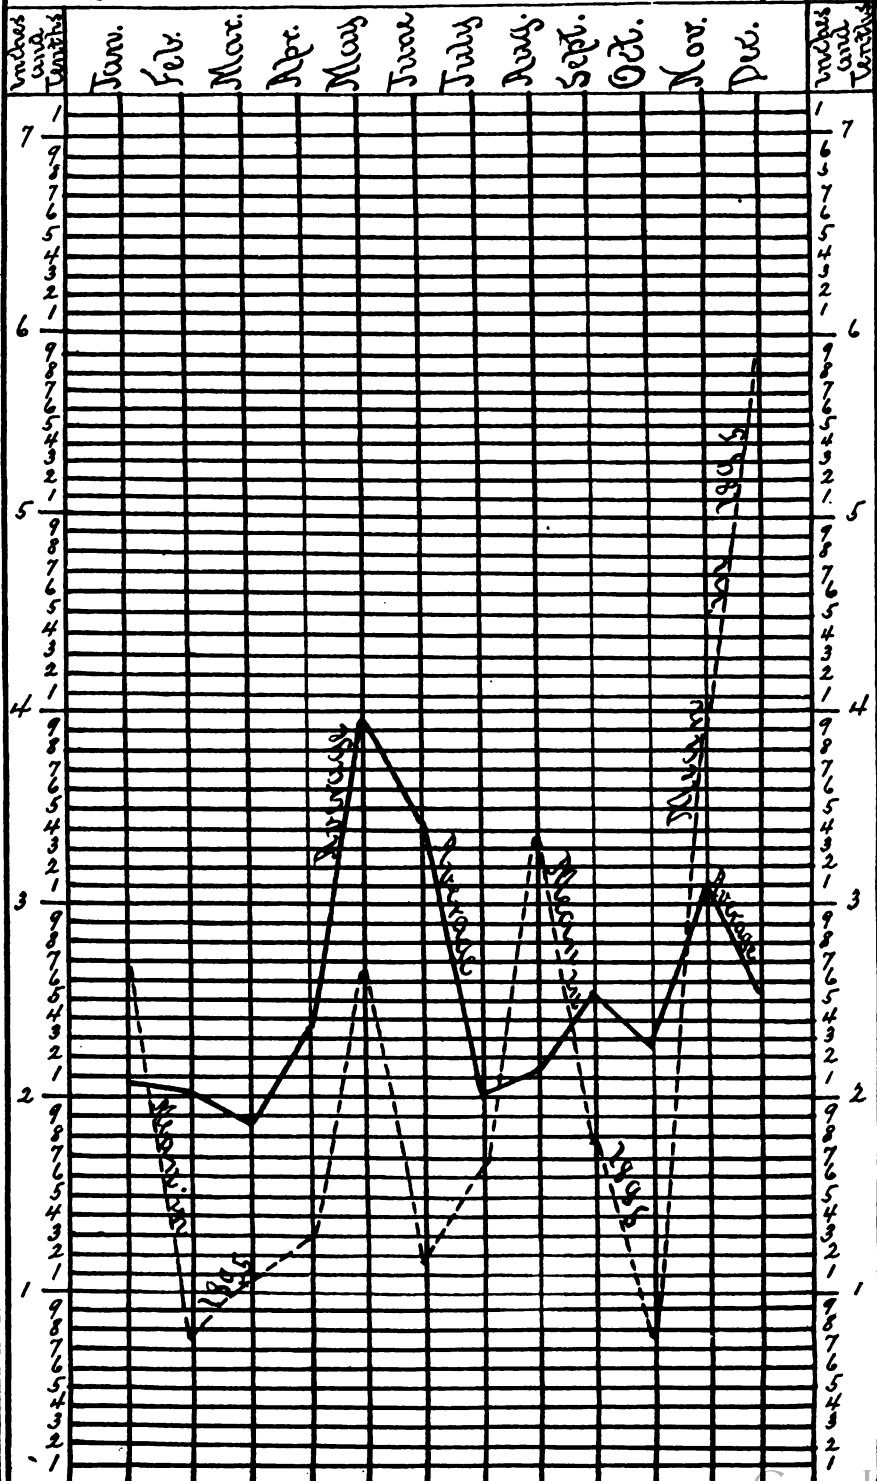

Months.	Southern counties.			Central counties.		
	Average or normal temperature.	Mean monthly temperature, 1895.	Departure from normal.	Average or normal temperature.	Mean monthly temperature, 1895.	Departure from normal.
January.....	22.8	15.3	-7.5	21.2	16.6	-4.6
February.....	23.6	16.8	-6.8	21.5	14.7	-6.6
March.....	31.2	28.1	-3.1	28.9	24.7	-4.2
April.....	45.5	48.4	+2.9	43.5	44.8	+1.3
May.....	56.8	59.1	+2.3	54.8	57.0	+2.2
June.....	68.7	70.4	+1.7	66.7	67.8	+1.1
July.....	71.1	69.5	-1.6	69.8	67.8	-1.5
August.....	68.8	70.4	+1.6	66.8	66.5	-0.3
September.....	61.9	66.0	+4.1	60.3	63.7	+3.4
October.....	47.9	44.2	-3.7	46.7	44.1	-2.6
November.....	35.5	35.9	+0.4	35.4	35.4	0.0
December.....	29.9	28.8	-1.1	29.0	27.9	-1.1
Sums.....	564.2	552.4	-----	543.4	531.0	-----
Averages.....	47.0	46.0	-1.0	45.3	44.3	-1.0

In the following table are shown, for the southern counties (southern four tiers), and the central counties (fifth and sixth tiers), respectively, by months, the average precipitation as determined by observations at the different meteorological stations during a long series of years, and the precipitation, and excess or deficiency of precipitation, as compared with such average, in the year 1895. The plus sign shows an excess and the minus sign a deficiency:

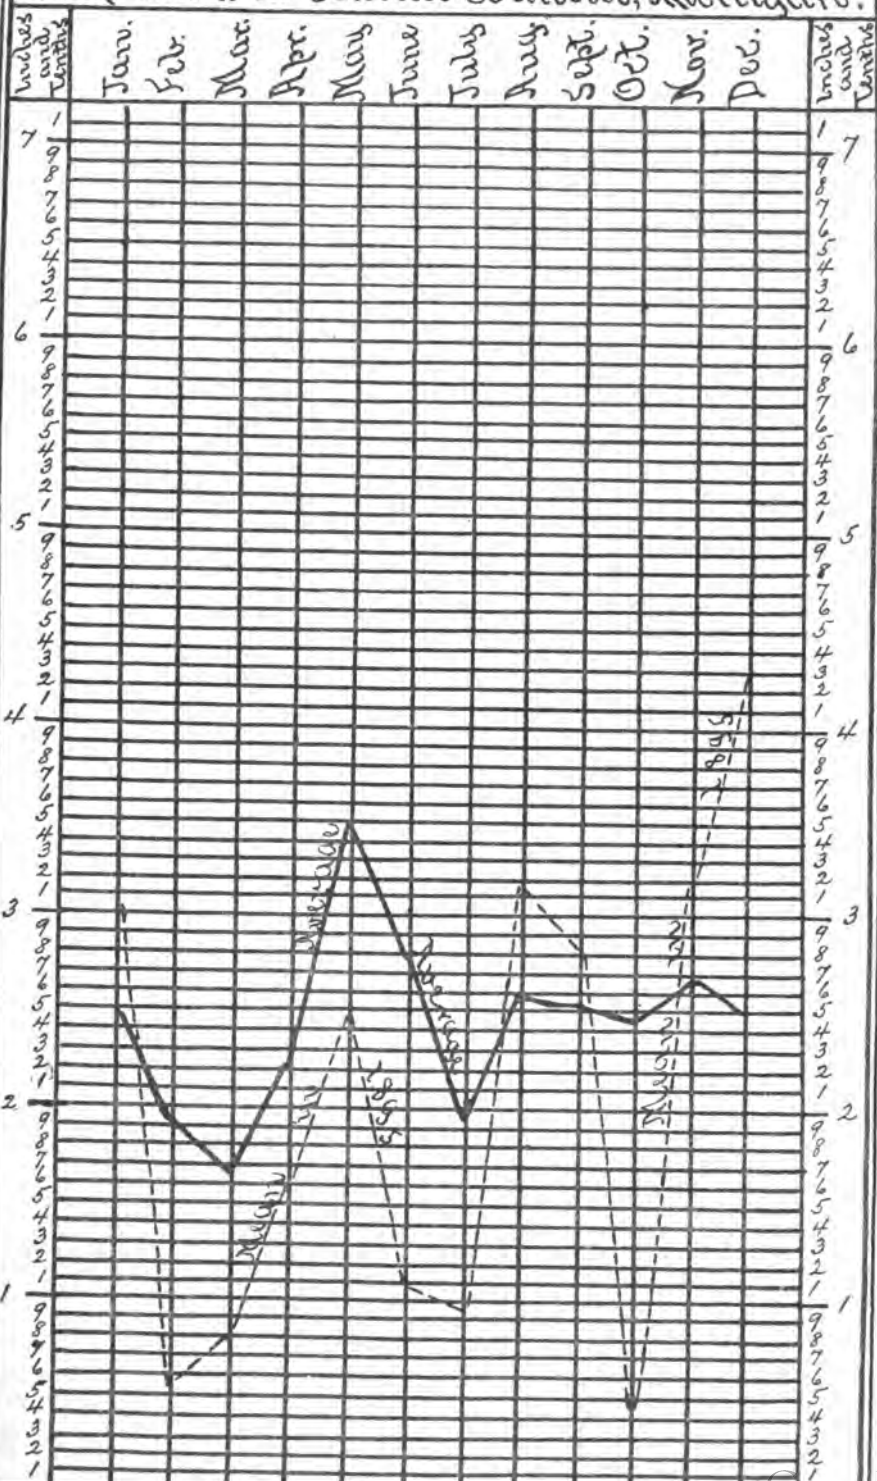

Months.	Southern counties.			Central counties.		
	Average or normal precipitation.	Mean monthly precipitation, 1895.	Departure from average or normal.	Average or normal precipitation.	Mean monthly precipitation, 1895.	Departure from average or normal.
January	2.09	2.68	+0.59	2.47	3.01	+0.54
February	2.08	0.76	-1.27	1.92	0.55	-1.37
March	1.89	1.08	-0.86	1.68	0.80	-0.88
April	2.36	1.80	-1.06	2.23	1.58	-0.65
May	3.93	2.63	-1.30	3.50	2.46	-1.04
June	3.46	1.18	-3.28	2.78	1.10	-1.68

Sums	30.88	26.88	-----	29.21	24.34	-----
Averages	2.53	2.24	-0.29	2.43	2.03	-0.40

B

Precipitation in Southern Counties, Michigan.

Precipitation in Central Counties, Michigan.

SUMMARY AND COMPARATIVE STATEMENT.

We present the usual summary and comparative statement as follows:

LAND IN FARMS.—The number of farms in the State in the spring of 1896 as shown by this report was 150,716, as compared with 147,154 returned in 1895. The increase is 3,562. The number returned for this report is greater than ever before reported.

The area of improved land in farms was 9,022,361 acres; of unimproved land, 4,547,221 acres; a total area in farms of 13,569,582 acres. As compared with previous reports there is an increase of the area of improved land, and of the total area in farms. Each report since 1887 has shown an increase of improved land. The area as returned for this report is 327,571 acres greater than reported in 1895, and the area reported in 1895 was 214,830 acres more than reported in 1894.

The improved land as returned for this report is but 127,009 acres less than the improved land "tilled, including fallow and grass in rotation (whether pasture or meadow)" reported in the census of 1894. The large increase from year to year of improved land reported in the Farm Statistics, indicates that these reports will soon show all the improved land in the State that is tilled including fallow and grass in rotation. The land devoted to market-garden truck and permanent pasture is not likely to be reported so long as the blank does not contain separate columns specially provided for such return.

The area of improved land in the southern counties is returned at 6,551,294 acres; in the central counties at 1,724,374 acres; in the northern counties at 617,131 acres, and in the upper peninsula at 129,562 acres. There was an increase in each section as follows: Southern counties, 143,108 acres; central counties, 111,470 acres; northern counties, 55,486 acres and upper peninsula 17,507 acres.

The total area in farms in the southern four tiers of counties is 8,995,721 acres; in the central counties, 2,775,752 acres; in the northern counties, 1,412,414 acres, and in the upper peninsula, 385,695 acres.

The State totals for 1879-96 are shown in the following table:

Years.	Acres of land in farms.			Number of farms.	Average number of acres in each farm.*
	Improved.	Unimproved.	Total.		
1879	5,735,102	4,580,486	10,315,588	111,816	92.66
1880	6,217,209	4,761,065	10,977,105	118,941	92.19
1881	6,274,235	4,708,298	11,077,165	119,769	92.40
1882	6,604,069	4,587,545	11,581,604	124,884	92.81
1883	6,917,636	4,589,452	11,757,108	128,840	91.18
1884	7,179,802	5,011,553	12,191,655	131,170	90.96
1885	7,280,775	4,926,448	12,207,218	135,107	89.95
1886	7,468,514	4,997,174	12,460,658	138,844	89.68
1887	7,579,155	4,830,130	12,409,285	138,742	89.50
1888	7,708,271	4,691,120	12,399,391	137,895	90.19
1889	7,865,168	4,657,052	12,522,250	135,018	90.68
1890	7,979,008	4,668,129	12,647,137	133,190	90.53
1891	8,256,185	4,605,779	12,861,964	146,806	87.66
1892	8,331,528	4,394,903	12,726,436	143,512	88.42
1893	8,396,024	4,347,597	12,713,919	141,049	90.05
1894	8,479,980	4,485,664	12,965,644	144,112	89.96
1895	8,694,790	4,527,595	13,215,855	147,154	89.76
1896	9,022,361	4,547,221	13,569,582	150,716	89.96

* Exclusive of cities.

The average size of farms in the State is 89.98 acres. The largest average size ever reported was in 1879, 92.68 acres, and the smallest, 87.66 acres in 1891.

The following table shows for the State and each section and for each county in the southern and central sections, the statistics of land in farms in the year 1896:

Southern four tiers of counties.	Acres of land in farms.			Number of farms.	Average number of acres in each farm.
	Improved.	Unimproved.	Total.		
Allegan	261,424	102,840	364,264	4,474	81.42
Barry	221,610	92,206	313,816	3,197	97.80
Berrien	208,827	77,082	285,910	3,378	83.01
Branch	301,291	53,106	354,397	3,124	90.61

WHEAT.—The average price of wheat, January 1, 1895, in the farmers' home markets was, in the southern and central counties and the State, 50 cents, and in the northern counties, 54 cents per bushel.

The average price for the State was five cents lower than on January 1, 1894, 16 cents lower than on January 1, 1893, 38 cents lower than on January 1, 1892, and 39 cents lower than on January 1, 1891.

The average prices in Detroit as shown by the report of the secretary of the Detroit board of trade, for No. 1 white wheat and for No. 2 red wheat, each month during the years named, were as follows:

Months.	No 1 white.									No. 2 red.								
	1895.	1894.	1893.	1892.	1891.	1890.	1889.	1888.	1887.	1895.	1894.	1893.	1892.	1891.	1890.	1889.	1888.	1887.

In September, 1891, the average price of No. 1 white wheat in Detroit was 95½ cents per bushel. The area sown to wheat that fall and harvested in 1892 was 1,622,244 acres, the largest acreage ever reported except in 1880, 1881, 1882 and 1887. In September, 1892, the price of wheat was 75½ cents, a decline of 20½ cents compared with the previous September, and the wheat acreage was reduced 89,173 acres. In 1893 the price had fallen to 65½ cents, a decline of 10 cents, and there was a further reduction of 260,901 acres in the wheat acreage. In 1894 the price had dropped to 54½ cents, and the acreage sown was 14,896 acres less than in the previous year. The total reduction since 1891 is 364,970 acres.

The actual acreage of wheat harvested in Michigan in 1895, sown in 1894, was 1,257,274 acres, and was the smallest reported since 1876.

The wheat area of the southern four tiers of counties was 1,031,298 acres, a decrease of 10,791 acres compared with 1894. The acreage in this section in 1895 was the smallest ever shown in these reports; it was 470,784 acres less than the acreage in 1880 which was the largest ever reported, and 258,085 acres less than the average annual acreage in the years 1876-94. The total number of acres of wheat raised in the State in the twenty years 1876-95 was 30,220,084, of which 25,529,579 acres were raised in the southern four tiers of counties, 3,885,100 acres in the central counties, and 805,405 acres in the northern counties and upper peninsula.

The total wheat product of the State in 1895 was 16,900,983 bushels. The total product was less than reported in any year since 1876; it was 4,547,432 bushels less than harvested in 1894, and 8,413,302 bushels less than the average annual crop in the years 1876-94. The crop in the southern counties in 1895 was 13,387,180 bushels, 8,380,734 bushels less than the average annual yield in this section in the years 1876-94. The average yield per acre in the State in 1895 was 13.44 bushels, and in the southern counties 12.98 bushels. In both the State and southern counties the average yield was less than in any year for which we have reports except 1881. The total product of the central counties was 2,857,686 bushels, an average of

16.20 bushels per acre, and of the northern counties and upper peninsula, 656,117 bushels, an average of 13.24 bushels per acre.

The total wheat product of the State in the twenty years 1876-95 was 497,872,397 bushels, of which 426,977,550 were raised in the southern counties, 59,948,085 bushels in the central counties, and 10,946,762 bushels in the northern counties and upper peninsula.

The following table shows for the State, the southern counties, the central counties, and the northern counties, the acreage, the yield in bushels, and the average yield per acre of wheat in each of the years, 1876-95; also for each section, and for each year, the per cent of acreage to the total acreage of wheat in the State, and the per cent of yield to the total yield in the State.

Years.	Wheat product.							
	State.			Of the southern four tiers of counties.

1894	177,163	13.33	2,773,205	12.93	15.66	53,913	4.16	728,925	3.40	13.77
1895	176,421	14.03	2,567,686	16.91	16.30	49,355	3.94	666,117	3.88	13.24
1876-95.	3,385,100	12.86	59,948,065	12.04	15.43	805,405	2.67	10,946,762	2.20	13.59

In the twenty years, 1876-95, 84.48 per cent of the total area, and 85.76 per cent of the total yield of wheat in the State, were grown in the southern four tiers of counties; and 12.86 per cent of the area, and 12.04 per cent of the yield, were grown in the central counties, leaving only 2.67 per cent of the area, and 2.20 per cent of the yield grown in the northern counties. The average yield per acre in the twenty years was 1.29 bushels less in the central than in the southern counties, and 1.84 bushels less in the northern than in the central counties. The yield per acre in the southern counties was 0.25 bushel higher than the average for the State. Of the total wheat acreage of the State, the proportion grown in the southern counties is now more than eight per cent less than in 1876.

The following additional statements are obtained from the foregoing table:

Average annual acreage of wheat in the State in the years 1876-95	1,511,004
Average annual yield of wheat in the State in the years 1876-95	24,893,620
Average annual yield of wheat per acre in the years 1876-95	16.47
Average annual acreage of wheat in the southern four tiers of counties in the years 1876-95	1,276,479
Average annual yield of wheat in the southern four tiers of counties in the years 1876-95	21,348,878
Average annual yield of wheat per acre in the southern four tiers of counties in the years 1876-95	16.72
Average annual acreage of wheat in the fifth and sixth tiers of counties in the years 1876-95	194,255
Average annual yield of wheat in the fifth and sixth tiers of counties in the years 1876-95	2,997,404

Average annual yield of wheat per acre in the fifth and sixth tiers of counties in the years 1876-95.....	15.43
Average annual acreage of wheat in the counties north of the sixth tier in the years 1876-95.....	40,270
Average annual yield of wheat in the counties north of the sixth tier in the years 1876-95.....	547,338
Average annual yield of wheat per acre in the counties north of the sixth tier in the years 1876-95.....	13.59

The total area, yield and average per acre of wheat in each tier of counties, in the southern and central sections of the State, in the twenty years ending with 1895, are shown in the following table:

Tiers of counties.	Wheat crops, 1876 to 1895, inclusive.		
	Acres.	Bushels.	Average yield per acre.
First	6,348,651	101,370,709	15.95
Second	6,255,136	107,755,515	16.95
Third	6,242,928	104,639,494	16.76
Fourth	6,552,979	113,331,033	17.31
Fifth	2,509,633	39,631,377	15.79
Sixth	1,375,478	20,516,505	14.77
The six tiers	29,414,679	496,925,636	16.86

The following table shows for the years 1895 and 1894 the wheat statistics of each tier of counties, from the first to the sixth inclusive, counting in order from the south line of the State:

Tiers of counties.	1895.			1894.		
	Acres.	Bushels.	Average yield per acre in bush.	Acres.	Bushels.	Average yield per acre in bush.
First	283,637	3,639,742	13.01	287,314	5,029,068	17.50
Second	265,291	3,490,098	13.16	266,432	4,635,173	17.40
Third	237,337	3,043,485	13.34	235,518	4,080,366	17.30
Fourth	245,033	3,158,855	13.39	233,536	4,300,168	16.83
Fifth	109,244	1,728,926	15.83	110,068	1,791,591	16.28
Sixth	67,177	1,123,720	16.80	67,095	962,214	14.64
Totals and averages	1,207,719	16,244,866	13.45	1,219,252	20,719,490	16.99

Not a county in the State produced a million bushels of wheat in 1895. The largest amount produced in any county was 772,375 bushels in Kalamazoo.

The number of acres in wheat in each tier of counties represented in the foregoing table in 1895 was as follows: First, 283,637; second, 265,291; third, 237,337; fourth, 245,033; fifth, 109,244, and sixth, 67,177, a total in the six tiers of 1,207,719 acres. Compared with 1894 there is a decrease in these six tiers of counties of 11,533 acres. The decrease is in the first, sec-

ond, fourth and fifth tiers. There was a small increase in the third and sixth tiers. The total yield in bushels in the first tier was 3,689,742; second, 3,490,098; third, 3,048,485; fourth, 3,158,855; fifth, 1,728,966, and sixth, 1,128,720. The total product of the six tiers was 16,244,866 bushels. There was a decrease in each tier except the sixth, the total decrease being 4,474,624 bushels. The yield per acre was less in 1895 than in 1894 in each tier except the sixth. In this there was an increase of 2.16 bushels. The average yield per acre for the six tiers was 3.54 bushels less in 1895 than in 1894. The highest average yield per acre was in the sixth tier of counties, 16.80 bushels.

The wheat product of the forty-one counties composing the six tiers averaged in 1895, 396,216 bushels for each county as compared with 505,353 bushels in 1894, 579,288 bushels in 1893, and 594,632 bushels in 1892. The average product in each of the twenty-eight counties composing the southern four tiers of counties was 478,114 bushels as compared with 640,917 bushels in 1894, and 730,252 bushels in 1893, and the average in each of the thirteen counties composing the fifth and sixth tiers was 219,822 bushels, as compared with 213,369 bushels in 1894, and 254,135 bushels in 1893.

CORN.—In acreage and aggregate yield the corn crop of 1895 was the largest yet reported. May and June were months of high temperature, July of rather less than normal temperature, and excessively dry weather prevailed from February until the third week in July, but in spite of the unfavorable weather corn made fairly good growth and on July 1 the condition was reported at 91 per cent of condition in average years. The drouth continuing to the middle of July told heavily on the crop, and on August 1 the condition was reported at 79, comparison being with vitality and growth of average years. The warm, wet weather of August was more favorable, pushing the crop rapidly forward, and at harvest it was found that the crop was one of the best ever grown in the State.

The area in corn in 1895 was 1,101,476 acres. This is 106,174 acres greater than the acreage of 1894 which was the largest ever reported previous to that date. The yield was 59,889,198 bushels of ears, or about 29,944,599 bushels of shelled corn. The largest aggregate product previously reported was in 1882, 56,929,495 bushels of ears. The average yield per acre was 54.37 bushels of ears. The yield per acre has been larger eight times in the preceding sixteen years. The total area of corn grown in the State in the seventeen years, 1879-95, was 14,202,835 acres, yielding 736,519,430 bushels of ears, or about 368,259,715 bushels of shelled corn. The average yield per acre in 1895 was 2.72 bushels of ears more than the average for the sixteen years, 1879-94. The area of corn grown in each section of the State in 1895, and per cent of area in each section to the total area of corn in State were as follows: Southern four tiers of counties 850,979 acres, or 77.26 per cent; central counties, 186,022 acres, or 16.89 per cent; northern counties, 63,988 acres, or 5.81 per cent, and upper peninsula, 487 acres, or 0.04 per cent.

OATS.—The area in oats in 1895 was 1,031,959 acres, an increase of 34,422 acres compared with the acreage of 1894, which was the largest reported previous to that date. This crop was greatly injured by the drouth as was clearly indicated by the reports received during the summer and fall. The average yield per acre as now returned was 26.58 bushels, or only 0.11 bushels more than the average in 1893, which was the smallest ever reported. The average in 1895 was 5.84 bushels less than the average for

the sixteen years, 1879-94. The total product was 27,432,307 bushels. The area in oats in 1895 was 292,878 acres greater than the average annual acreage and the total product 3,469,416 bushels greater than the average annual product in the sixteen years 1879-94. The total area of oats grown in the State in the sixteen years, 1879-95, was 12,857,260 acres, yielding 410,838,559 bushels.

The area of oats grown in each section of the State in 1895, and per cent of area in each section to the total area of oats in the State, were as follows: Southern four tiers of counties 718,698 acres, or 69.64 per cent; central counties, 237,781 acres, or 23.04 per cent; northern counties, 57,041 acres, or 5.53 per cent and upper peninsula, 18,439 acres, or 1.79 per cent.

The following table shows for the State, the number of acres, the total yield, and average yield per acre, of corn and oats in each of the years 1879-95.

Years.	Corn.			Oats.		
	Acres.	Bushels of ears.	Average per acre.	Acres.	Bushels.	Average per acre.
1879.....	742,859	42,764,123	57.57	440,723	15,089,855	34.25
1880.....	741,404	45,805,111	61.38	466,345	12,914,723	29.85

1890.....	880,064	42,319,116	50.98	890,096	25,582,751	28.74
1891.....	827,605	45,171,413	54.58	826,481	29,614,875	35.83
1892.....	700,525	34,599,145	49.39	825,833	24,638,737	29.84
1893.....	797,797	37,761,594	47.33	843,406	22,323,976	26.47
1894.....	995,802	42,225,492	42.42	997,537	29,069,319	29.18
1895.....	1,101,476	59,589,198	54.37	1,081,959	27,432,307	26.58
1879-95.....	14,202,335	736,519,430	51.86	12,857,260	410,838,559	31.95

RYE.—The number of acres of rye raised in 1895 was 263,895; the yield, 3,647,783 bushels; average per acre, 13.82 bushels. Compared with the census returns of rye in 1893, there is an increase of 115,160 in acres, of 1,832,443 bushels in total product and of 1.62 bushels in average per acre. The acreage in 1893 was more than four and one-half times the acreage in 1883. Rye has never before been reported in the Farm Statistics.

BEANS.—The number of acres of beans raised in the State in 1895 was 185,860; number of bushels, 2,109,338; average per acre, 11.35 bushels. Compared with the crop of 1893 as shown in the State census, there is an increase of 42,595 acres and 981,260 bushels. This crop has never been reported in the Farm Statistics before.

CLOVER SEED.—The number of acres of clover seed raised in 1895 was 46,610; bushels, 38,718; average per acre, 0.83 bushels. The acreage and total product are the smallest ever returned, and the average per acre has been less only in 1883 and 1892. The total product is but a little more than half the crop of 1894 which was less than any crop previous to that date. The average per acre in the sixteen years, 1879-94, was 1.21 bushels.

The area of clover seed grown in each section of the State in 1895, and per cent of area in each section to total area of clover seed in the State, were as follows: Southern four tiers of counties, 41,218 acres, or 88.43 per cent; central counties, 5,174 acres, or 11.10 per cent; northern counties, 216 acres, or 0.46 per cent, and upper peninsula, 2 acres, or 0.00 per cent.

POTATOES.—The area of potatoes grown in 1895 was 280,605 acres; yield, 27,400,613 bushels; average per acre, 97.64 bushels. The acreage and total yield were both greater in 1895 than ever before reported, and the average yield per acre has been reported greater only in 1884, 1885, and 1891.

The acreage in 1894 was greater than reported previous to that date, but the acreage in 1895 exceeded that of 1894 by 44,270 acres, and the yield in 1895 was 11,873,978 bushels greater than in 1894. The total number of acres grown in the State in the seventeen years, 1879-95, was 2,460,111, and the number of bushels, 215,537,973.

The area of potatoes grown in each section of the State in 1895, and per cent of area in each section to total area of potatoes in the State, were as follows: Southern four tiers of counties, 150,616 acres, or 53.68 per cent; central counties, 72,346 acres, or 25.78 per cent; northern counties, 49,924 acres, or 17.79 per cent, and upper peninsula, 7,719 acres, or 2.75 per cent.

The average yield per acre in 1895, in the southern counties, was 92.03 bushels, in the central counties, 91.88 bushels, in the northern counties, 118.81 bushels, and in the upper peninsula, 124.33 bushels.

HAY.—The number of acres of hay raised in 1895 was 1,412,383; tons, 843,600; average number of tons per acre, 0.60. The acreage was less than in any previous year since 1888; the product more than 1,000,000 tons less than in 1894, 1,438,938 tons less than in 1893, and more than 200,000 tons less than the crop of 1879 which was the smallest of record. The average per acre was 0.60 tons, which is 0.42 tons less than the smallest of which we have record, and but a trifle more than one-half the average for the sixteen years, 1879-94.

The outlook for hay was not promising at any time during the season. As early as May 1 meadows and pastures showed the effects of the drouth, and it was clearly seen that unless an abundance of rain came soon they would be greatly damaged. On June 1 the average condition in the southern counties was 67; central, 75; northern, 85, and State, 71, and in July the reports showed that meadows and pastures were probably never in poorer condition at that date, and spring seeding to clover was nearly all lost. The averages reported in June indicated from two-thirds to seven-tenths of an average crop. The actual yield was less—it was only half a crop per acre on a greatly reduced acreage.

The total number of acres of hay raised in the seventeen years, 1879-95, was 23,414,211, an average of 1,377,307 acres each year, and the total number of tons was 26,913,731, an average of 1,583,161 tons each year.

The area of hay grown in each section of the State in 1895, and per cent of area in each section to total area of hay in the State, were as follows: Southern four tiers of counties, 978,602 acres, or 69.29 per cent; central counties, 264,942 acres, or 18.76 per cent; northern counties, 115,494 acres, or 8.18 per cent, and upper peninsula, 53,345 acres, or 3.77 per cent.

The following table shows for the State and each section, and for each county in the southern and central sections, the acres and yield in 1895, of corn, oats, clover seed, potatoes and hay:

	Corn, 1895.		Oats, 1895.		Clover seed, 1895.		Potatoes, 1895.		Hay, 1895.	
	Acres.	Bushels of ears.	Acres.	Bushels.	Acres.	Bushels.	Acres.	Bushels.	Acres.	Tons.

SHEEP AND WOOL.—The number of sheep sheared in 1895 was 1,752,414, a decrease as compared with the number sheared in 1894 of 288,284. The number of sheep sheared in each year from 1878 to 1895 inclusive, is shown in the following table. It will be noticed that after 1878 there was an increase each year to and including 1884, that after 1884 there was a decrease each year to and including 1890, and that after 1890 there was an increase each year to and including 1893. The number sheared in 1894 was 27,365 less than in 1893 and in 1895 there was a further decrease of 288,284.

Years.	Number.	Years.	Number.
1878.....	1,670,790	1887.....	2,069,492
1879.....	1,823,580	1888.....	2,089,974

1884.....	13,827,543	5.68	1893.....	12,692,920	6.14
1885.....	13,344,695	5.64	1894.....	12,267,007	6.01
1886.....	12,362,799	5.31	1895.....	10,814,366	6.17

The number of farmers in the State in the spring of 1896 was 150,716, of whom 95,177 were in the southern four tiers of counties, 34,795 in the central counties, and 20,744 in the northern counties and upper peninsula. In the southern counties the number of owners of sheep was 35,379, or 37 per cent of the whole number of farmers in this section; in the central counties, 13,448 or 39 per cent of the farmers were sheep owners, and in the northern counties 3,831, or 18 per cent of the farmers were sheep owners. In the State 52,658 farmers were owners of sheep. This is 35 per cent of the whole number of farmers in the State. The percentage of farmers owning sheep is less in each section of the State than shown by the table for 1895. The number of farmers owning sheep in the southern counties is 4,974 less than in 1895, and the number in 1895 was 2,346 less than in 1894.

The proportion of farmers owning sheep in the southern counties ranged from 12 per cent in Wayne county, to 51 per cent in Branch, Eaton and Washtenaw. The lowest and highest percentages in 1895 were 15 in Wayne and 60 in Clinton and Livingston.

In the southern counties the average number of sheep owned by each sheep owner is 30, in the central 15, and in the northern 11, the average for the State being 25. The average number of sheep to each farm in the southern counties is 11, in the central 6, and in the northern 2, the average for the State being 9. Compared with 1895 there is in each section of the State a decrease both in the average number of sheep owned by each sheep owner, and in the average number of sheep to each farm.

The following table shows for the State and each section, and for each county in the southern and central sections, the number of farmers, the number and per cent of such farmers that own sheep, the number of sheep, the average number to each sheep owner, and the average number to each farm:

Southern four tiers of counties.	No. of farmers, 1896.	Farmers owning sheep, 1896.		Number of sheep.	Average number of sheep owned by each sheep owner.	Average number of sheep to each farm in the State.
		Number.	Per cent.

Upper peninsula.....	36,440	35,621	23,656	30,949	37,373	44,178	281,714
.....	7,705	7,696	6,788	4,375	4,656	3,929	22,617
State.....	424,083	406,306	245,253	374,017	1,381,667	1,752,414	10,814,365

The number of horses in the State in the spring of 1896 was 434,038; milch cows, 405,205; cattle other than milch cows, 245,252; hogs, 374,017; sheep, 1,323,697. Table 1 of the comparative tables shows the total of each class of live stock in the State for five years.

In these reports only live stock six months old and over is included, and the totals do not, as a rule, include live stock in cities.

FRUIT.—The number of acres in apple orchards in the spring of 1896 is reported at 225,397, and the number of acres in peach orchards at 35,773.

The number of bushels of apples raised in 1895 was 783,473; bushels sold, 492,569.

The number of bushels of peaches raised in 1895 was 1,621,091; bushels sold, 1,577,977. The value of apples and peaches sold in 1895 was \$1,101,315 as compared with \$1,164,356 in 1894, \$809,990 in 1893, \$940,921 in 1892, and \$1,010,836 in 1891.

The number of bushels of strawberries sold in 1895 was 61,967; value, \$130,142. The number of pounds of grapes sold in 1895 was 4,153,041; value, \$60,854.

The value of cherries, pears and plums, sold in 1895 was \$108,800; of berries other than strawberries sold, \$278,422; and of market-garden products sold, \$576,860.

The total value of fruits of all kinds, and of market-garden products sold in 1895 was \$2,256,393, as compared with \$2,533,852 in 1894, and \$2,070,868 in 1893.

COMPARATIVE STATEMENT.

The following table shows the State totals of certain products in 1895 and the averages of the corresponding totals for the sixteen years, 1879-1894:

	1895.	Averages of 1879-94.
Wheat—Acres harvested.....	1,257,374	1,573,462
Wheat—bushels raised.....	16,900,983	25,677,359
Wheat—average number of bushels per acre.....	13.44	16.13
Corn—acres harvested.....	1,101,478	818,835.
Corn—bushels of ears raised.....	59,889,198	43,289,389
Corn—average number of bushels of ears per acre.....	54.37	51.65
Oats—acres harvested.....	1,081,959	739,081
Oats—bushels raised.....	27,493,307	23,962,891
Oats—average number of bushels per acre.....	26.58	32.42
Clover seed—acres harvested.....	46,610	180,739
Clover seed—bushels raised.....	38,718	215,478
Clover seed—average number of bushels per acre.....	0.83	1.21
Potatoes—acres harvested.....	280,603	186,219
Potatoes—bushels raised.....	27,400,613	11,768,585
Potatoes—average number of bushels per acre.....	97.64	86.32
Hay—acres harvested.....	1,412,383	1,375,114
Hay—tons raised.....	843,600	1,629,883
Hay—average number of tons per acre.....	0.60	1.18
Sheep—number sheared.....	1,753,414	2,098,084
Wool—pounds sheared.....	10,814,366	12,267,602
Wool—average number of pounds per head.....	6.17	5.85

The following table shows the number of acres in all and in each of the crops named, in the year 1895, and the per cent of acres in each crop to the total number of acres in all crops, and also to the total number of acres of improved land in 1895.

	Number of acres in all and in each of the crops named.*	Per cent of acres in all and in each crop to total number of acres in all crops.*	Total number of acres of improved land.*	Per cent of acres in all and in each crop to total number of acres of improved land.*
Totals	5,125,990	100 00	9,015,372	56.86
Wheat	1,256,280	24.51	13.86
Corn	1,100,340	21.46	12.31
Oats	1,031,249	20.12	11.44
Clover seed	46,802	.9152
Potatoes	250,867	5.47	3.11
Hay	1,411,173	27.53	15.63

*Exclusive of cities.

Expressed approximately, of the total acreage in the six crops, wheat, corn, oats, clover seed, potatoes and hay, one-fourth was in wheat, one-fifth in corn, one-fifth in oats, one-one-hundredth in clover seed, one-eighteenth in potatoes and three-tenths in hay. Fifty-six and eighty-six-hundredths per cent of the improved land in the State, in 1895, was devoted to the production of these six crops, leaving forty-three and fourteen-hundredths per cent in orchards, gardens, etc.

APIARIAN STATISTICS, 1895-96.

The number of apiarists in the State as returned in this report is 5,199, a decrease of 753 as compared with 1894.

The number of colonies of bees in the fall of 1895, is returned at 50,405, or 16,377 less than in the fall of 1894. The number at the time of taking the assessment in the spring of 1896 was 39,419. The number at the time of taking the assessment in the spring of 1895 was 48,939, showing a decrease of 9,520.

The number of colonies in the fall of 1895 was 1,466 more than reported on hand in the spring of the same year. In other words, this number, 1,466, is the increase in the number of colonies during the summer of 1895.

The number of colonies wintered in cellars is returned at 8,838; in chaff hives, 17,057; in bee houses, 164; covered with sawdust, 145; otherwise protected, 3,109; with no protection, 16,919, and for 4,173 colonies the protection, if any, was not reported.

In 1895, 37,657 colonies produced 632,645 pounds of comb honey; 10,968 colonies produced 169,093 pounds of extracted honey, and 12,167 colonies produced 7,017 pounds of wax.

The comb honey produced in 1895 was 123,699 pounds less, of extracted honey, 19,516 pounds less, and of wax 1,198 pounds less than produced in 1894.

AREA IN WHEAT AND NUMBER OF CATTLE AND SHEEP TO EACH 100 ACRES OF IMPROVED LAND.

The following table shows for the State and each section, and for the counties in the southern and central sections, the number of acres of improved land in 1894, the number of acres of wheat harvested in 1895, and number of cattle and sheep in 1894 to each 100 acres of improved land in 1894, also the average yield of wheat per acre in 1895. The table is exclusive of all cities, and also of all upper peninsula counties.

In the southern counties the average number of cattle to each 100 acres of improved land is 6.56, average number of sheep 26.45, of cattle and one-eighth of the sheep 9.87.

Comparing the numbers in the column showing the number of cattle and one-eighth of the sheep in the southern counties, the highest number is in Ingham county, 12.30, and the second highest in Lapeer county, 12.28; and the lowest in St. Joseph county, 6.54. The number of cattle and one-eighth the number of sheep to each 100 acres of improved land in the central counties is 2.69 more than in the southern section.

In the southern counties the area in wheat to each 100 acres of improved land averages 16.31 acres, the highest acreage being in Calhoun county, 24.93 acres, and the lowest in Wayne, 7.68 acres. In the central counties the area of wheat to each 100 acres of improved land averages 11.43 acres; in the northern counties, 9.09 acres, and in the State 14.98 acres.

The area in wheat to each 100 acres of improved land was less in 1895 than in 1894 in each section of the State. The decrease in the southern counties was 0.16, in the central counties, 0.64, and in the northern counties, 1.17 acres. The average decrease for the State was 0.36 acres.

Southern four tiers of counties.	Number of acres of improved land in 1894.	Wheat harvested in 1895 (sown in 1894.)		Cattle and sheep in 1894 to each 100 acres of improved land.		
		Number of acres to each 100 acres of improved land.	Average yield per acre in bushels.	Number of cattle and one-eighth number of sheep.	Number of cattle.	Number of sheep.

The following shows the value of the crops named, raised in 1895, 1894, 1893, 1892, 1891, and 1890, figured from the best data available:

	1895.	1891.	1893.	1892.	1891.	1890.
Wheat.....	\$9,986,442	\$10,753,855	\$12,949,067	\$16,434,742	\$24,674,745	\$20,488,123
Corn.....	9,432,125	9,631,092	7,552,319	7,957,326	11,066,996	11,849,352
Oats.....	5,802,725	8,963,894	8,259,871	8,212,929	9,772,909	11,256,410
Hay.....	10,625,890	14,094,948	19,086,367	17,056,538	16,506,140	14,626,078
Clover seed.....	166,487	414,079	982,054	1,040,185	1,274,416	824,732
Potatoes.....	3,425,077	8,539,849	6,115,141	8,103,820	4,174,966	7,007,690
Apples and peaches sold.....	1,101,815	1,161,856	809,990	940,921	1,010,836	944,332
Small fruits sold.....	578,218	775,251	791,062	754,870	609,915	621,042
Market-garden prod- ucts sold.....	576,880	594,245	469,816	513,170	417,447	601,671
Wool.....	1,622,155	1,840,061	1,967,403	2,275,514	2,450,000	2,938,000
Totals.....	\$43,276,764	\$56,790,810	\$38,932,090	\$63,289,963	\$71,957,370	\$71,102,440

The total value of the crops named above, raised in 1895, was \$43,276,764. The same crops in 1891 were valued at \$71,957,370; in 1892 at \$63,289,963; in 1893, \$58,933,090, and in 1894 at \$56,790,840. The value in 1895 was \$28,680,606 less than in 1891. This decrease is 40 per cent of the value of the crops in 1891.

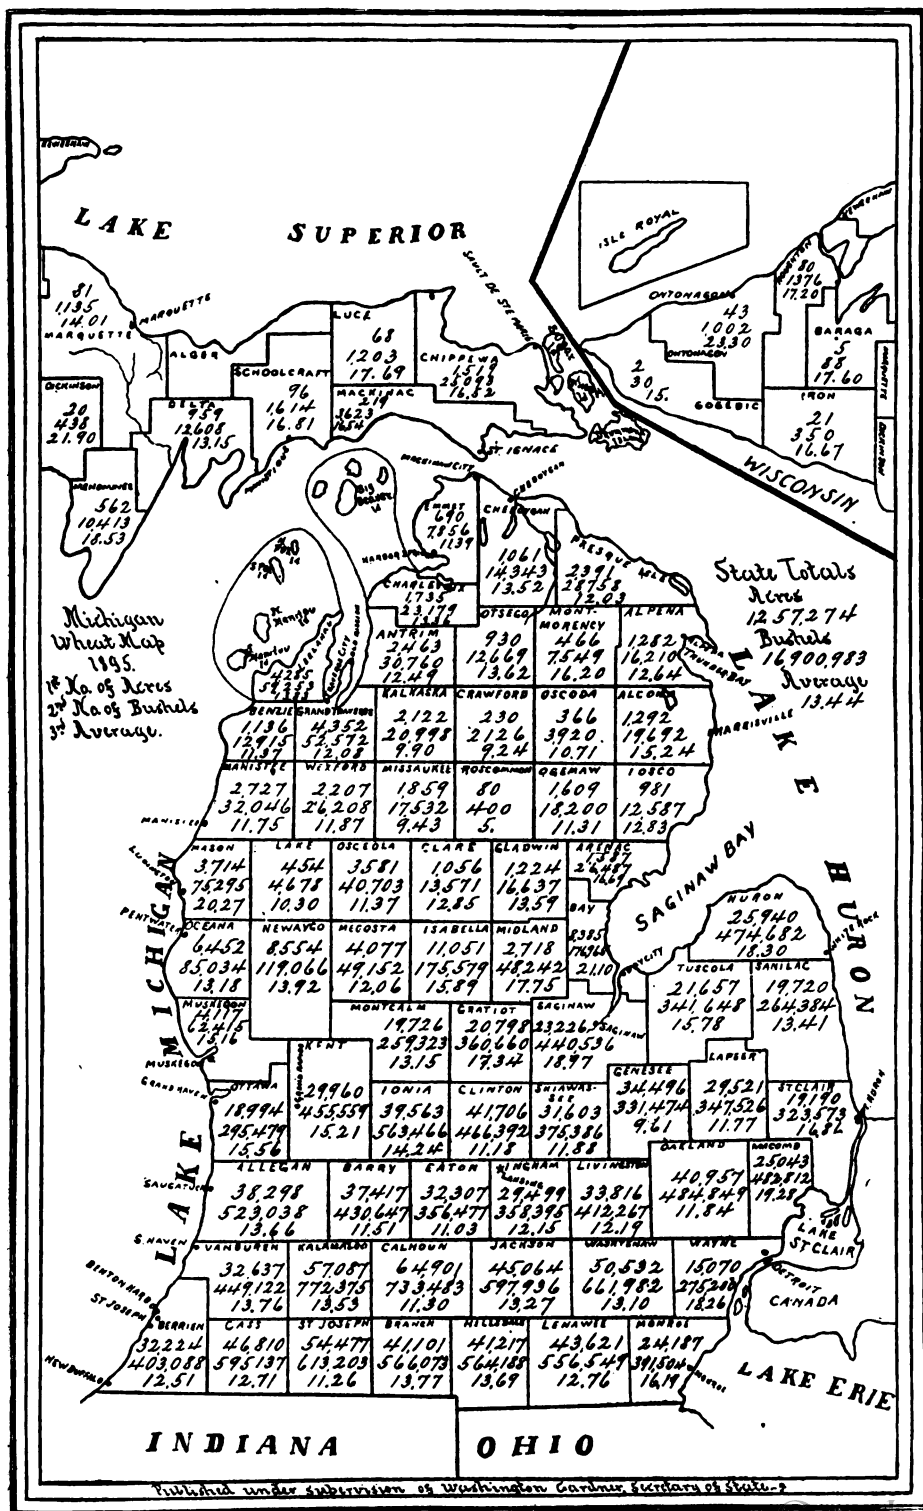

The value of the crops per farm was, in 1895, \$294. The value per farm in 1890 was \$515; in 1891, \$491; in 1892, \$440; in 1893, \$418, and in 1894, \$394. The value per farm in 1895 was \$221 less than in 1890.

The value of the crops per acre of improved land in 1895 was \$4.98. In 1890 it was \$8.91; in 1891, \$8.72; in 1892, \$7.60; in 1893, \$7.04, and in 1894 \$6.70. The value per acre of improved land was \$3.93 less in 1895 than in 1890.

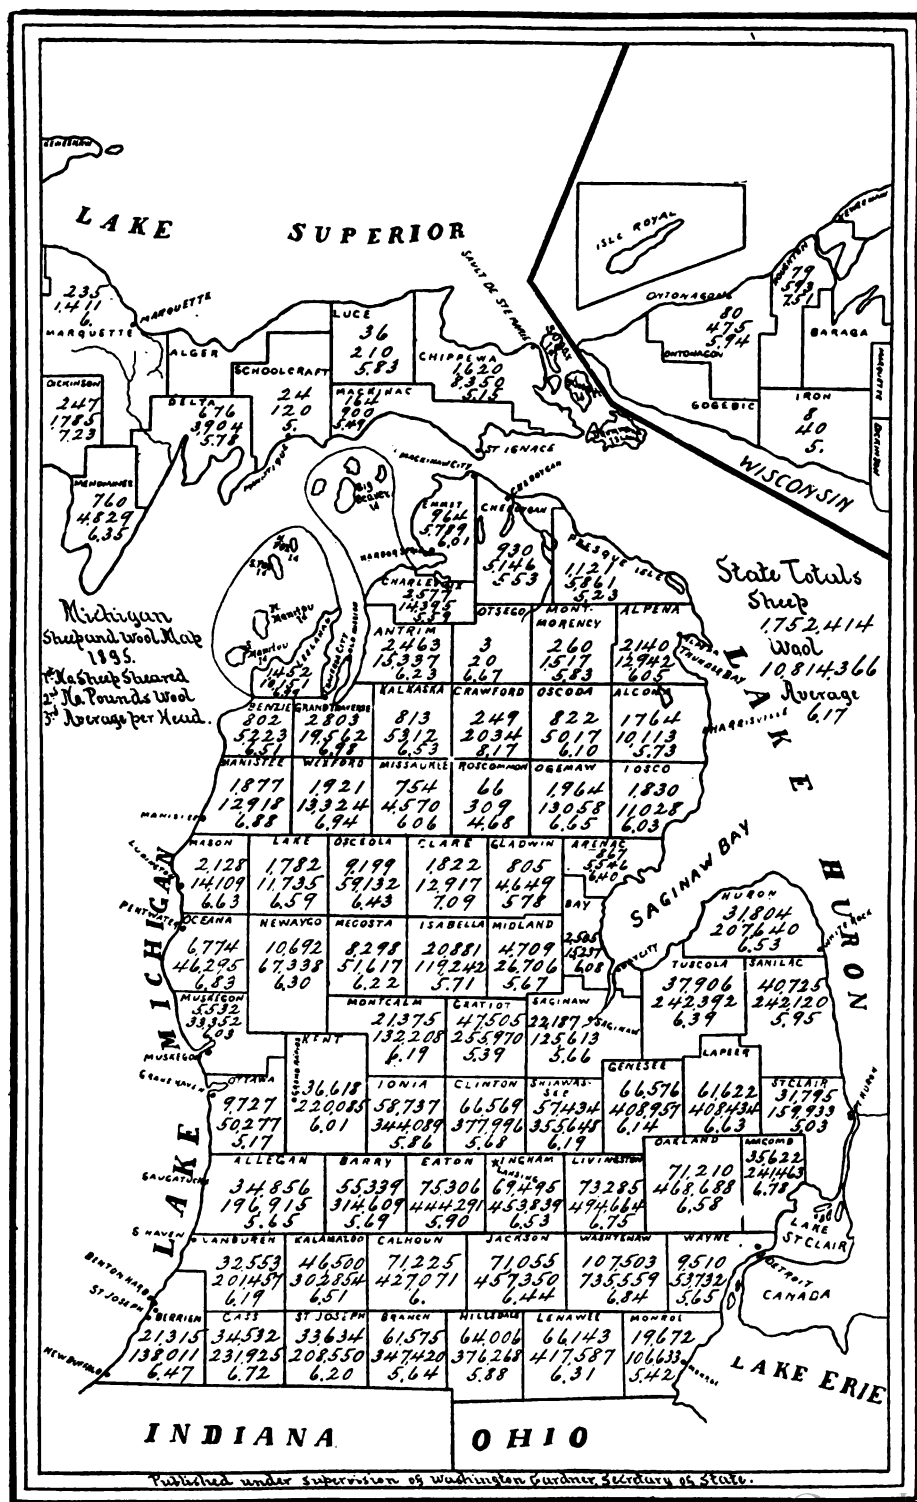

No statistics of the value of pasture, nor of fruit and market-garden products raised but not sold, are available, nor are there any statistics of the increase in live stock.

WASHINGTON GARDNER,

Secretary of State.

a Acres in May, 1896, as shown by the preceding report.

b Obtained by multiplying the acres in wheat in May, 1895, as shown by the preceding report, by the average yield per acre in the townships of this county that have reported both the acreage and yield.

c Not reported, but an assumed acreage, equal to the acreage in May, 1896.

d Copied from the preceding report.
